## Cosmetic Tattoo

### AFTERCARE

#### DAY OF YOUR APPOINTMENT

- Blot with water wipes every other hour until you go to bed.

#### NEXT DAY OF YOUR APPOINTMENT

- Blot with a water wipe in the morning & apply a thin layer of healing cream.
- Apply the healing cream 3 times throughout the day.
- Before you go to bed, gently wash the tattooed area with Cetaphil wash and apply a thin layer of healing cream.
- Continue the healing cream 3 times a day until the initial healing is finished.

#### AFTERCARE

- No cleansers, skincare, make-up, swimming pools, saunas, sweating or direct water on the area for 5 days.
- Do not touch your tattoo with your fingers for 5 days.
- It will be 3-4 weeks before the true colour appears. For some clients it is perfect, others it may be too light or patchy in some areas. If this is happening and the skin is healed, you can apply brow makeup until your scheduled perfection appointment.

---

#### IMPORTANT NOTES ON WHAT IS NORMAL TO EXPECT:

- Your tattoo will go much darker within the first 24 hours (this is temporary)
  - Your tattoo may become itchy as they heal. This is part of the normal healing process. Do not scratch
  - You may get a headache the day of your treatment (yes, you can take Panadol)
  - Your tattoo will shrink approx. 2mm within 2-5 days
  - Your tattoo can fade up to 80% by the end of the first week
-
